

Large Venue.

Bringing Ultra HD Presentations
to Larger Audiences

Adding to the Casio lamp-free line up, the NEW XJ-L8300HN Ultra HD model features a 4K DLP® chip supporting a resolution of 3840 × 2160 pixels and brightness of 5,000 lumens.

This offers audiences exceptionally sharp and detailed images with bright and vivid colour reproduction. The built-in lens shift function manually corrects the visual positioning of the image without reducing the resolution, meaning the highest possible image quality is always projected. The XJ-L8300HN also supports upscaling ensuring that the benefits of 4K UHD are not lost when displaying lower resolution content through the projector. The latest addition to the Casio range is ideal for halls and seminar rooms, rental & staging market, visitor attractions, command and control environments and CAD design work.

Key features

- Lamp-free
- 4K UHD resolution
- 5,000 ANSI lumens
- 1.5 x optical zoom
- Lens shift
- 2 x HDMI
- Quick start and stop
- RS-232C control
- 20,000 hour lifetime
